I am a DevOps engineer with 1.5 years of experience building backend infrastructure. I incorporate system design principles into everything I built to achieve scalability and performance of the application and good customer experience.

SKILLS

- **AWS:** VPC, EC2, S3, Lambda, EKS, Route53, Cognito, Bedrock
- **AI:** RAG (AWS Bedrock), LLM
- **Tools:** Linux, Terraform, Docker, Kubernetes, GitHub Action, Helm, ArgoCD, Prometheus, Grafana
- **Programming Languages:** Golang, Python, SQL, PHP
- **Other tools:** GIT, GitHub, REST, PostgreSQL, Redis

PROJECTS

1. **Groovify (DevOps)** | *AWS, Terraform, Docker, Docker Compose* | [[Project](#)]
 - Implemented DevOps practices on a 3-tier music streaming project using — 1. containerization using Docker, 2. infrastructure creation through Terraform, and 3. CI/CD pipeline configuration using GitHub Actions and 4. AWS services.
 - Performed migration on: Clerk to **AWS Cognito** (Auth service), Cloudinary to **AWS S3** (Object storage service), MongoDB to **AWS DocumentDB** (database service).
2. **MediGo AI (DevOps-AI)** | *AWS (Bedrock, Cognito, Lambda), AI (RAG)* | [[Project](#)]
 - Built a **RAG (AI) pipeline** for an existing Golang project that answers developers' questions using the project's internal documentation. The solution was built on **AWS Bedrock** using AgentCore Harness and Knowledge Bases.
3. **The Wardrobe (DevOps)** | *EKS, Kubernetes, ArgoCD, Terraform, GitHub Actions* | [[Project](#)]
 - Build a DevOps end-to-end pipeline on an E-Commerce microservices project that includes deployment on AWS EKS (Kubernetes) using Helm and ArgoCD.
 - Infrastructured the whole project using Terraform making security as top-priority for the application. Integrated Observability stack - **Prometheus** and **Grafana** in order to measure the performance of the entire project and take actions based on that.

EDUCATION

B.M.S Institute of Technology

Bachelor of Technology – Information Science & Engineering;

Courses: Object Oriented Programming, Data Structures & Algorithms, DBMS, Web of Things

Bengaluru, India

Aug 2019 - Jul 2023

D.A.V Public School, Koyla Nagar

CBSE (Class XII);

Dhanbad, India

Jul 2017 - May 2018

Work EXPERIENCE

Webyansh | Full-Stack Developer

Remote | Jul 2024 - Sept 2024

- Created backend system for multiple clients - ShopBox and Hopstack, and contributed to the company's most potential client, by creating their backend infrastructure through Webflow CMS and integrated API vendors—Google API for a differentiable feature.

Namaste Credit | Software Engineer

Bengaluru, India | Feb 2023 - Jun 2024

- Developed and maintained the NC portal for a seamless client onboarding experience using jQuery, and PHP, ensuring secure and authenticated service through robust system implementation. Played a key role in the UCIC project, which was instrumental in driving business growth that helped enhance Muthoot Fincorp's profitability through strategic project involvement.
